Jim & Bob

EPA's comments on the LWG's April 12, 2011 FS Check-in meeting presentations and the Summary Screening tables (submitted April 14th) are attached. Please note that EPA is providing these comments on the presentation and tables to facilitate discussion on the screening of technologies, planning for the June 22nd FS Key Elements check-in meeting and preparation of the draft FS report. EPA comments on the Summary Screening tables are provided as a mark-up of the LWG's tables rather than as individual comments.

As noted in the General Comments, the April 12 meeting presentation provided a site-wide and AOPC level screening of technologies but did not present the development, screening and assembly of comprehensive remedial alternatives. It is critical that EPA and the LWG have a common understanding of the remedial alternatives that will be carried forward into the detailed analysis of alternatives in the draft FS, and that is a primary objective of the June 22, 2011 FS check-in meeting.

We look forward to discussing these comments and working with the LWG on the development of remedial alternatives for the draft FS. EPA may follow up with specific direction to the LWG based on the outcome of the discussions.

Please don't hesitate to call us if you have any questions.

Chip
